About Me

Mechanical Engineering PhD candidate specializing in CFD, multiscale modeling, and high-performance computing. Experienced in leading research projects on soot formation and combustion, with several publications and a distinguished research fellowship. Passionate about mentoring students and collaborating across disciplines to drive innovative, sustainable solutions. Currently seeking an opportunity to further advance cutting-edge research in computational engineering.

Education

Ph.D in Mechanical Engineering (Marquette University) **Aug 2019 – May 2025 (Expected)**
Dissertation: Fundamental Investigation of Soot Formation, Evolution and Morphology *Milwaukee, WI*

MS in Mechanical Engineering (Marquette University) **Aug 2017 – May 2019**
Thesis: Effect of Radiation and EGR on Pollutant Formation in Spray Combustion Systems *Milwaukee, WI*

Relevant Coursework

- Transport Phenomenon
- Thermodynamics
- CFD
- Heat and Mass Transfer
- Adv. Algorithm
- Adv. Machine Learning
- Air Quality Engineering
- Distributed Computing

Honors and Awards

Awarded Richard W. Jobling Distinguished Research Fellowship | *Marquette University* **Feb 2023**
Outstanding Research Assistant Award | *Marquette University* **Apr 2021**
Awarded Dean's List Scholarship | *Bangladesh University of Engineering & Technology* **2011&2012**

Experience

Marquette University **Aug 2017 – Present**
Graduate Assistant *Milwaukee, WI*

- Conducted impactful research during my MS and Ph.D., with findings presented at conferences and journals.
- Exhibited strong proficiency in multidiciplinary computational skills, encompassing CFD, molecular modeling, and high-performance computing.
- Instructed and graded a range of undergraduate Mechanical Engineering courses, including Heat Transfer, Fluid Mechanics, Dynamics of Machinery, Thermodynamics, and Measurement and Material Properties Lab.
- Mentored graduate students in the use of essential research tools including `Git`, `Linux`, `Python`, and LaTeX.

Bangladesh University of Engineering & Technology **Mar 2016 – Aug 2017**
Graduate Assistant *Dhaka, BD*

- Actively mentored two undergraduate senior group on their thesis, focusing on linear and explosive heating through molecular dynamics and numerical modeling of a thermally stratified co-axial jet using `ANSYS:FLUENT`.

Technical Skills

Languages: Python, C/C++, `MATLAB`, `FORTRAN`, HTML, Bash
Tools: VS Code, PyCharm, Autocad, SolidWorks, Tecplot, Paraview, Tableau
Technologies/Frameworks: Linux, Git
Simulation Tools: OpenFoam, LAMMPS, ANSYS:FLUENT, COMSOL, CONVERGE CFD

Other Professional Activities/Leadership / Extracurricular

Entangled Air | *An exhibition bringing together the art of TOMÁS SARACENO and my research at CCL* **Spring 2022**

- A series of social outreach raising awareness about air quality.
- Developed artwork while fostering community engagement and advocating the importance of clean air.

Python Summer School | *A week-long python bootcamp for high school studnets* **Summer 2023**

- Guided 15 high school students to create their own air quality data visualizations using Python.

Bangladesh Student Organization at Marquette University (BSAMU) **Jun 2021 – May 2023**
President *Marquette University*

- Organized a number of cultural events and social services to bring the community together.
- Managed executive board of 10 members and ran bi-weekly meetings to oversee progress in essential parts of the organization.
